STOCK MARKET DEVELOPMENTS

During the month of December 2015, global markets recorded losses due to concerns of the slowdown in the Chinese economy. The decline occurred despite the United States of America Federal Reserve Bank interest rate hike of 0.25%.

Over the same period, African markets also recorded losses partly due to concerns over an acceleration of capital outflows, as global investors shifted their portfolio investments to the US market.

The Zimbabwe Stock Exchange (ZSE) recorded mixed trading with the industrial index recording losses, whilst the mining index recovered some of the losses it had registered during the year. The industrial index lost 2.3%, from 117.6 points in November 2015 to 114.9 points in December 2015. This was underpinned by losses in heavily capitalized counters. Over the same period, the mining index gained 6.2%, from 22.3 points to 23.7 points.

Source: Zimbabwe Stock Exchange, 2015

Trading volumes increased in the month of December 2015, following block trades in Dawn, Delta, Econet and Simbisa shares. These block trades raised the total volume of shares traded from 90.4 million shares in November 2015, to 183.8 million shares in

December 2015. Over the same period, turnover also rose from US\$8.9 million to US\$16.4 million.

Source: Zimbabwe Stock Exchange, 2015

The losses recorded in heavily capitalized counters resulted in the ZSE market capitalisation declining further to US\$3 073.4 million in December 2015, from US\$3 141.7 million in November 2015.

MONETARY DEVELOPMENTS

Annual growth in money supply¹ continued on an upward trend rising to 8.2% in December 2015, from 7.5% in November 2015. On a monthly basis, broad money rose by 0.4% to US\$4 765.4 million in December 2015. The growth was underpinned by increases in most deposit classes.

Source: Reserve Bank of Zimbabwe, 2015

The annual growth in broad money was largely driven by an increase of US\$263.3 million; US\$61.5 million; and US\$44.7 million in demand, savings and long-term deposits, respectively. Demand deposits constituted 51%; long term, 19%; short term, 17%, and savings, 13% of total deposits.

The year-on-year growth in total banking sector credit continued on an upward trend, rising to 27% in December 2015, from 22.8% in November 2015. On a monthly basis, banking sector credit increased by 4% in December 2015 to US\$5 560.7 million, from US\$5 345.3 million in November 2015.

¹ Money supply is total deposits less interbank deposits.

Figure 4: Banking Sector Deposits December 2015

Source: Reserve Bank of Zimbabwe, 2015

Annual growth in credit to the private sector grew by 1% in December 2015, down from 2% in November 2015. Month-on-month, credit to the private sector, however, declined by 1.7% to US\$3 835.7 million in December 2015.

The sectorial distribution of private sector credit was as follows: agriculture (21.2%); services including tourism (17.1%); distribution (13.2%); manufacturing (16.2%); mining (5.9%); financial organisations and investments, (3.7%); transport and communications (3%); and construction (1.1%). Credit to households stood at 18.6% in December 2015, partly reflecting the dominance of consumptive borrowing in the economy.

Figure 5: Credit to Private Sector December 2015

Source: Reserve Bank of Zimbabwe, 2015

In terms of proportions, private sector credit was used as follows: asset purchases, 43.4%; inventory build-up, 34.3%; consumer durables, 13.1%; and vehicle purchases, 3.4%. Notably, funds utilized for capital development remained low at 4.5% of total loans and advances. Pre and post shipment financing accounted for 1.3% of total credit to the private sector.

INFLATION OUTTURN

Annual Inflation

The annual headline inflation declined marginally to -2.47% in December 2015, from -2.46% recorded in November 2015. The slight increase in inflation was

mainly driven by food inflation. Partially offsetting this increase was a decline in non-food inflation.

Figure 6: Annual Inflation (%)

Source: ZIMSTAT, 2015

Annual inflation has remained in negative territory since October 2014, due to the continued downward correction in both food and non-food prices and low aggregate demand in the economy.

The year-on-year food inflation stood at -3.7% in December 2015, an increase from the October 2015 rate of -4.0% and November 2015 rate of -3.9%. Food inflation was weighed down by declines in bread and cereals and vegetables.

Annual non-food inflation decelerated from -1.8% in November 2015 to -1.9% in December 2015. The decline was largely driven by housing, water, electricity, gas and other fuels; communication; furniture, household equipment and maintenance and clothing and footwear. The 11.1% increase in

education inflation, however, partially offset the declines in other sub-categories.

Monthly Inflation

The month-on-month inflation rate for December 2015 stood at -0.11%, shedding 0.27 percentage points from 0.16% recorded in November 2015. The decline was driven by both food and non-food inflation.

Monthly food inflation reverted to negative territory, falling from 0.04% in November 2015, to -0.21% in December 2015. This was mainly influenced by bread and cereals; milk, cheese and eggs; and oils and fats. The declines in these sub-categories were, however, partially offset by positive monthly inflation recorded for vegetables; meat; and sugar, jam, honey, chocolate and confectioneries, which recorded in December 2015.

Likewise, the monthly non-food inflation rate fell, shedding 0.28 percentage points from the November 2015 rate of -0.22%. The decline was largely driven by transport; alcoholic beverages and restaurants and hotels.

NATIONAL PAYMENTS SYSTEM

Zimbabwe Electronic Transfer Settlement System (ZETSS)

The value of transactions processed through the RTGS system increased by 17% in December 2015 to US\$4.17 billion, from US\$3.55 billion recorded in November 2015. The volume of transactions registered an increase of 8% from 143 435 to 155 044 during the same period.

Mobile and Internet Based Transactions

The total value of mobile and internet based transactions increased from US\$571.3 million in November 2015, to US\$690.8 million in December 2015.

Source: Reserve Bank of Zimbabwe, 2015

Card Based Transactions

Card based transactions also increased from US\$477.9 million in November 2015, to US\$557.9 million in December 2015.

Cheque Transactions

The value of cheque transactions registered an 8.9% decrease, from US\$12 million in November 2015, to US\$11 million in December 2015.
