INTERNATIONAL COMMODITY PRICE DEVELOPMENTS

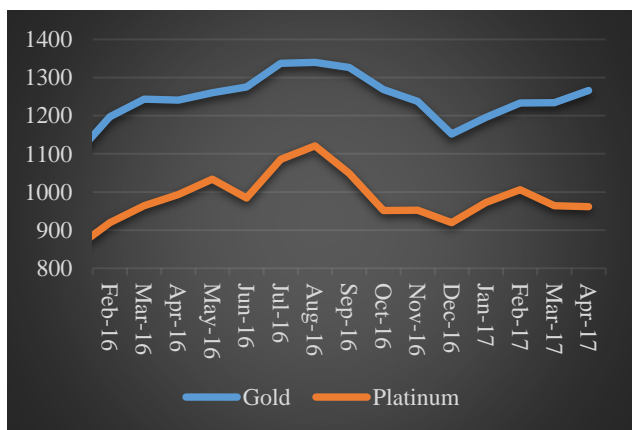

During the month of April 2017, international commodity prices for gold increased, whilst those for platinum, copper, nickel and crude oil retreated.

Precious Metals

Gold prices recorded the highest gains in almost five months during the first two weeks of April 2017. This was on account of safe haven demand for gold amid rising uncertainties over US relations with Russia and North Korea. Overall, gold prices rose by 2.57%, from an average of US\$1234.04/ounce in March 2017 to an average of US\$1265.83/ounce in April 2017 as the dollar weakens against major trading currencies. The upward trend, however, reversed during the second half of the month as investors shifted focus to interest bearing assets.

Platinum prices declined by -0.22% from an average of US\$963.83/ounce in March 2017 to US\$961.68/ounce in April 2017. The decline was underpinned by subdued demand.

Figure 1: Precious metals prices

Source: Bloomberg, 2017

Base Metals

The prices of base metals retreated during the month of April 2017, amid concerns of a global glut, triggered by slowing housing prices in China, which is the biggest user of base metals. Consequently, the average prices of copper and nickel slumped by 1.7% and 6.7% to US\$5,712.32/ton and US\$9,688.53/ton in April 2017, respectively.

Brent Crude Oil

During the month of April 2017 crude oil prices stood at US\$53.66/barrel from an average of US\$53.3/barrel in March 2017. Crude oil prices were weighed down by signs of further gains in U.S. crude output and lingering doubts over the proposed extension of oil output cuts by OPEC.

MONETARY DEVELOPMENTS

Over the year to April 2017, broad money¹ grew by 22.67% to US\$6 116.8 million, from US\$4 986.3 million recorded in April 2016. The growth was largely driven by an increase of 31.22% in transferable deposits². Partially offsetting the increase, were declines of 20.99% and 2.42% in negotiable certificates of deposits (NCDs)³ and time deposits⁴, respectively.

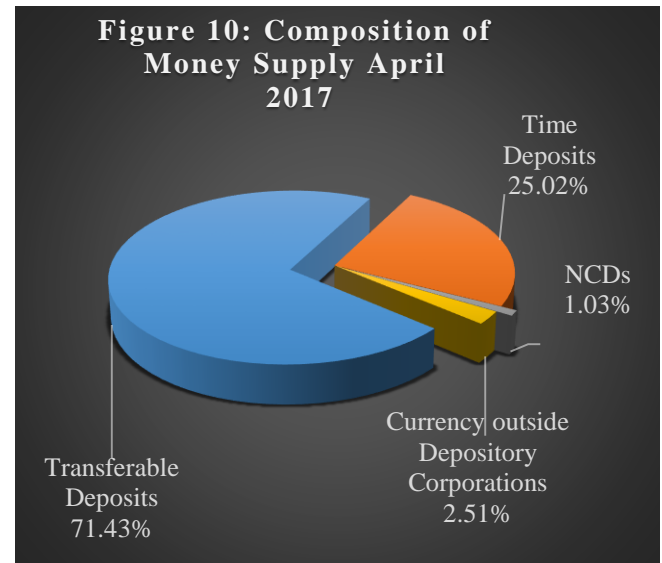

On a month on month basis, broad money grew by 4.03%, from US\$5 879.9 million in March 2017. The expansion of money supply, in part, reflects injection of new money into the banking system through tobacco sales for which US\$206.4 million worth of tobacco had been sold by end of April 2017.

Source: Reserve Bank of Zimbabwe, 2017

¹ Beginning January 2017, broad money redefined using IMF's Monetary and Financial Statistics Manual of 2000. Major changes include the exclusion of Government deposits held by banks from broad money.

The composition of broad money during the month of April was as follows: transferable or transitory deposits, 71.43% time deposits, 25.02%; currency in circulation, 2.51%; and negotiable certificates of deposits, 1.03%.

Source: Reserve Bank of Zimbabwe, 2017

On an annual basis, domestic credit increased by 19.06%, from US\$6 869.8 million April 2016 to US\$8 179.3 million in April 2017. For the month of April, domestic credit increased by 2.95%, from US\$7 920.2 million recorded in March 2017, with claims on government expanding by 6.44% and credit to the private sector declining by 1.78%.

² Transferable deposits made up of demand and savings deposits.

³ NCDs are also referred to as securities included in broad money.

⁴ All classes of time deposits, short and long term are classified as time deposits, which are also termed other deposits.

Credit to the private sector⁵, recorded a decline of 0.33% from \$3 443.5 million in April 2016, to US\$3 432.0 million in 2017. The decline in credit to the private sector is reflective of a subdued bank lending.

Source: Reserve Bank of Zimbabwe, 2017

During the month under review, outstanding credit to the private sector was distributed as follows: households, 22.10%; agriculture, 16.51%; manufacturing, 13.97%; services, 13.56%; distribution, 13.16% and financial organisations, 10.99%. Mining, transport and communications and construction sectors, which require long term capital investments, accounted for only 5.19%, 2.34% and 1.70% of total credit, respectively.

Private sector credit was utilised as follows: inventory build-up, 28.75%; consumer durables,

⁵ Credit to the private sector now excludes claims on other financial corporations, as well as claims on state and local government (local authorities)

15.43%; fixed capital investment, 14.27%; and pre and post shipment financing, 1.40%. Other recurrent expenditures accounted for 40.15% of the total outstanding loans and advances.

STOCK MARKET DEVELOPMENTS

The Zimbabwe Stock Exchange (ZSE) continued on an upward trend at the back of positive trading in heavily capitalised counters despite low trading volumes. This resulted in both the industrial and mining indices registering increases of 4.00 points and 7.77 points to close at 142.96 points and 66.33 points, respectively, in April 2017. The increase in the resources index was largely driven by improved investor interest in RioZim Limited, following the acquisition of a gold mining concern from Falgold. This acquisition is expected to boost RioZim's gold production.

Source: Zimbabwe Stock Exchange, 2017

The volume of shares traded on the ZSE market decreased by 47.77% to 75.86 million in April 2017, compared to 145.24 million in the month ending 31st March 2017. The low trading activity in the market resulted in a 58.40% decline in market turnover from US\$26.93 million in March 2017 to US\$11.20 million in the month under review.

INFLATION OUTTURN

Annual Inflation

The annual headline inflation continued on an upward trajectory, accelerating from 0.21% in March 2017 to 0.48% in April. The increase in inflation was driven by both food and non-food inflation.

Source: ZIMSTAT, 2017

Year-on-year food inflation surged by 0.14 percentage points, from 1.21% in March 2017 to 1.35% in April 2017. Likewise, non-food inflation increased from -0.25% in March to 0.08% in April 2017. The increase in food inflation is largely attributable to the rise in the

price of imported food items, whose supply has been affected by SI 64. It is, however, anticipated that the good agricultural season and the rise in import substitution for most food items will dampen food prices in the medium term, barring other domestic supply constraints.

Annual non-food inflation became positive at 0.08% in April 2017 from -0.25% in March 2017. For most goods and services, the price increases were largely driven by supply constraints, as domestic production remains subdued due to relatively high domestic costs.

The largest price level increases in non-food items over the year to April 2017, occurred in secondary school tuition fees, rentals for fixed telephones, rent in high density areas and fuels, among others. The increases were, however, partially offset by decline in prices of gas, paraffin, carpets, among others.

Monthly Inflation

Month-on-month inflation increased from 0.03% in March 2017 to 0.05% in April 2017, largely driven by increases in non-food inflation, which surged from 0.15% in March to 0.25% in April 2017.

Source: ZIMSTAT, 2017

Non-food inflation was driven by housing, water, electricity, gas; other fuels; education; communication; and restaurants and hotels.

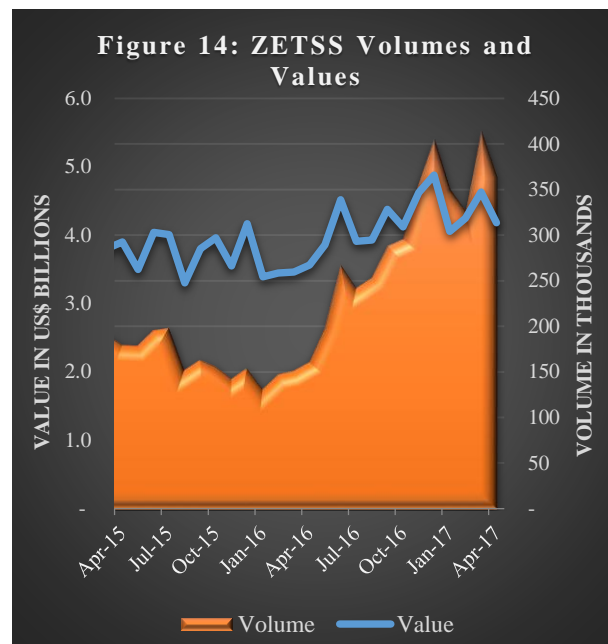

Monthly food inflation, however, declined by 0.15 percentage points, from -0.21% in March 2017 to -0.36% in April 2017. This was on account of decreases in bread and cereals; meat, oils and fats; among others, associated with seasonal increases in food supply at harvest.

NATIONAL PAYMENTS SYSTEM

During the month under review, the total value of transactions processed through the National Payment System (NPS) stood at US\$6 954.94 million in April 2017, down from US\$7 011.38 million in March 2017. The total volume of NPS transactions, however, increased by 15%, from 50 729 474 in the previous month to 58 962 241 during the month under review.

Zimbabwe Electronic Transfer Settlement System (ZETSS)

The value of transactions processed through the RTGS system declined by 9.7% to US\$4 178.78 million in April 2017, from US\$4 629.83 million recorded in March 2017. RTGS transactions volumes also registered a 12% decrease from 414 167 in March 2017 to 363 743 during the period under review.

Source: Reserve Bank of Zimbabwe, 2017

Cash transactions

Cash transactions increased by 45.1%, from US\$316.64 million in March 2017 to US\$459.61 million during the month of April 2017.

Mobile and Internet Based Transactions

The total value of mobile and internet based transactions closed the month of April 2017 at US\$1 130.11 million, up from US\$1 071.32 million in March 2017.

Card Based Transactions

Card based transactions also increased from US\$451.00 million recorded in March 2017, to US\$506.14 million in April 2017.

Cheque Transactions

The value of cheque transactions declined by 35.3%, to close the month of April 2017 at US\$4.77 million.

Note:

- (i) Depository corporations survey - formerly Monetary Survey.
(ii) Broad money redefined using IMF's Monetary and Financial Statistics Manual of 2000. Major changes include exclusion of Government deposits held by banks from broad money.
(iii) Transferable deposits made up of demand and savings deposits.
(iv) NCDs are also referred to as securities included in broad money.
(v) All classes of time deposits, short and long term are classified as time deposits, which are also termed other deposits.
(vi) Credit to the private sector now excludes claims on other financial corporations, as well as claims on state and local government (local authorities)
(vii) Depository corporations made up of the Central Bank and other depository corporations
(viii) Other depository corporations (ODCs) - Commercial banks, merchant banks, building societies and POSB.
