STOCK MARKET DEVELOPMENTS

In August 2013, the Zimbabwe Stock Exchange (ZSE) succumbed to selling pressure as investors unwound their pre-elections positions. The largest losses were recorded in Delta, African Sun, Zimre Property Investments, and Mashonaland Holdings.

As a consequence of the high selling pressure, the volume of shares traded for August was 409 million shares, 37.29% higher than the 297.91 million shares traded in July 2013. Over the same period, the value of shares traded also rose by 24.46% to US\$54.18 million.

Between July and August 2013, the industrial index declined by 21.99% to close the period under review at 181.67 points. On a year-to-date basis, the industrial index gained 20.07%.

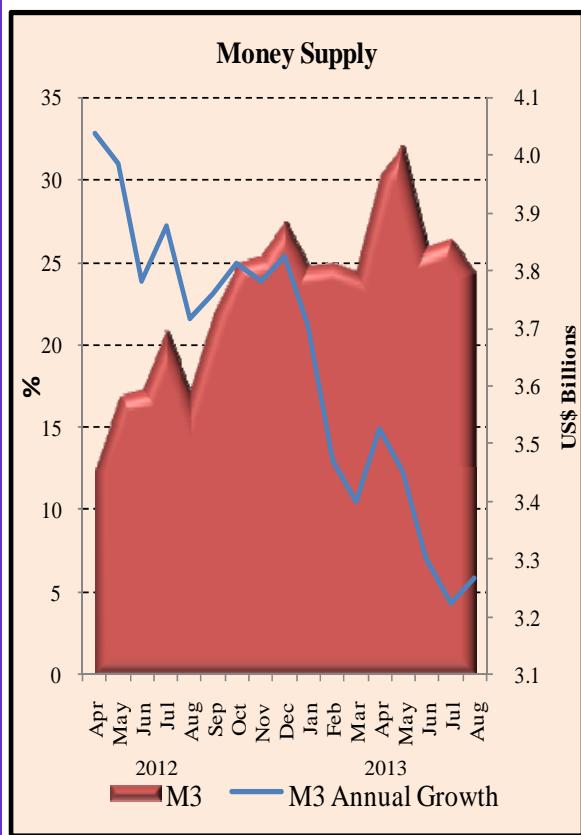

The mining index also fell by 27.02%, from 66.77 points in July to 48.73 points in August 2013. On a year-to-date basis, the mining index lost 26.49%.

Trading on the local bourse continued to be dominated by foreign investors. Purchases by foreign investors were recorded at US\$33.31 million in August 2013, against US\$18.44 million in July. Over the same period, sales by foreign investors rose to US\$29.18 million from US\$15.30 million.

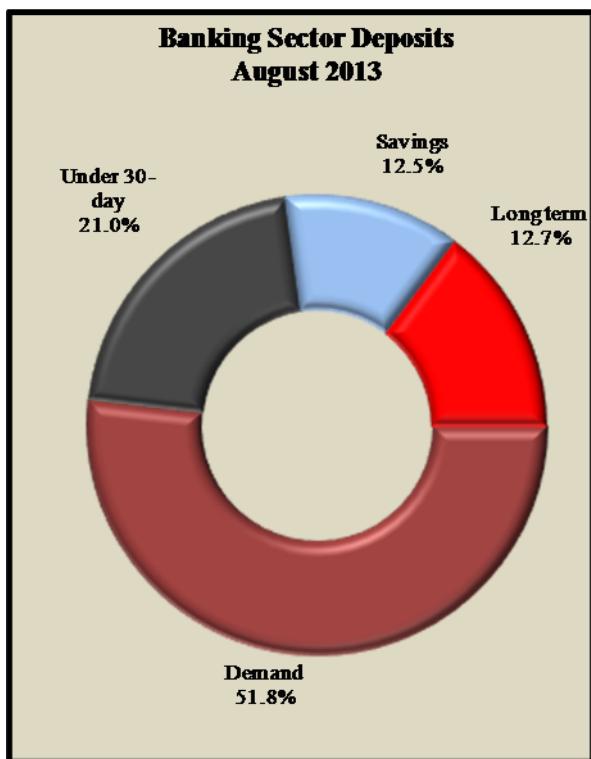

Market capitalization declined by 23.13%, from US\$6 billion at the end of July to US\$4.62 billion at the close of August 2013, largely driven by losses in industrial blue chip counters.

MONETARY DEVELOPMENTS

After declining for the past 3 months, annual broad money growth increased to 5.77% in August 2013, from 4.26% in July. The marginal recovery in annual broad money largely reflected deposit maturities being rolled over.

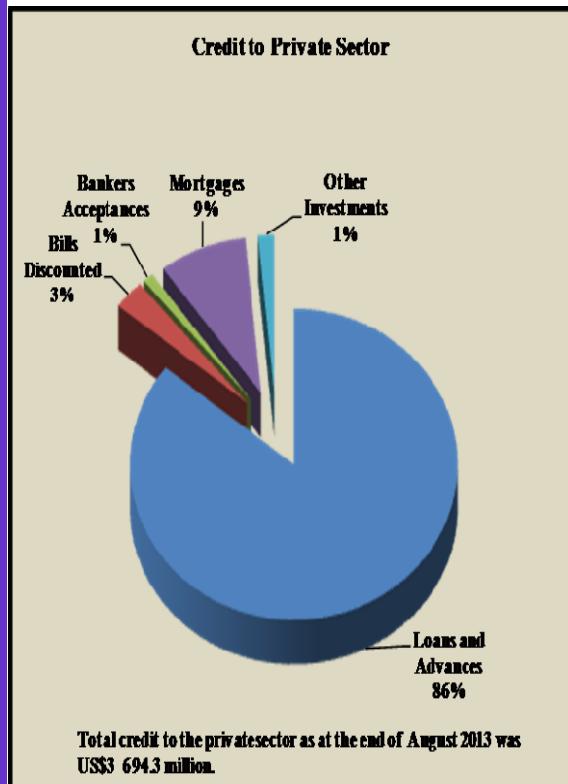

On a month on month basis, however, broad money declined by 1.5% to US\$3 796.24 million in August 2013, from US\$3 854.92 million in July 2013. The month on month decrease in broad money was on the back of withdrawals on most deposit classes. Major declines in deposits occurred at commercial banks, which registered net outflows across all deposit classes amounting to US\$56.08 million, during the month of August 2013.

Annual growth in credit to the private sector further declined by 0.71 percentage points, from 13.55% in July to 12.84% in August 2013. On a month on month basis, credit to the private sector registered a marginal growth of 0.61% in August 2013, from US\$3 671.82 million in July 2013 to US\$3 694.33 million.

The loan to deposit ratio rose to 97.32% in August 2013, compared to 95.25% in July 2013, reflecting that credit to the private sector continued to be driven by loans and advances, due to limited financial

instruments in the Zimbabwean money market. Domestic credit was also partly sustained by offshore lines of credit, as the local economy continued to face liquidity constraints. The contribution of offshore lines of credit in total credit to the private sector, increased marginally, from 12.36% in July 2013 to 12.40% in August 2013.

Advances to the private sector were made up of loans and advances, 85.68%; mortgages advanced by building societies,

8.68%; bills discounted, 3.04%; bankers' acceptances, 1.04%; and other investments, 1.56%.

Loans and advances were largely channeled to agriculture (19.05%), manufacturing (17.12%) and distribution (15.99%) activities. Households accounted for 16.55% of total loans and advances to the private sector.

Credit to the private sector was mainly utilized for asset purchases (41.23%) as well as inventory build-up (34.74%). Loans and advances utilized for fixed investment activity have remained low, with the procurement of plant and equipment accounting for 2.95% and pre and post shipment financing at 2.21%, of total loans and advances.

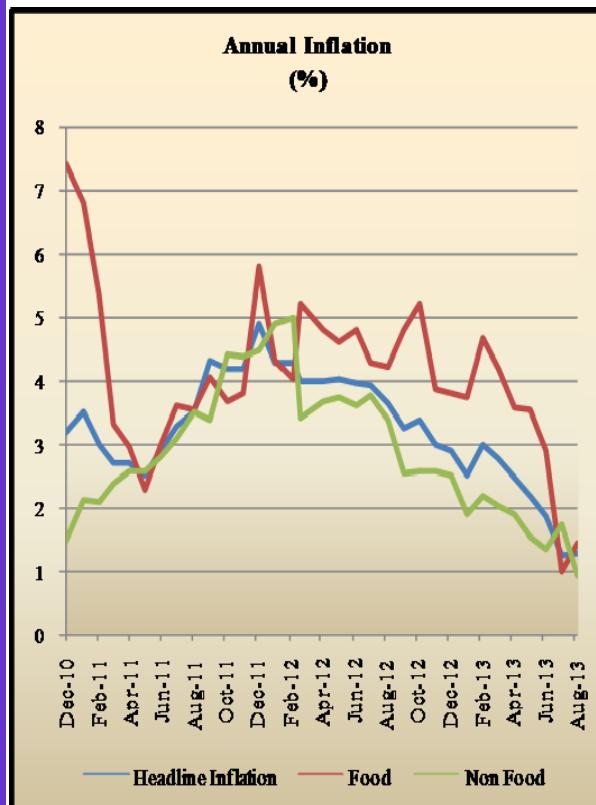

INFLATION DEVELOPMENTS

Annual Inflation

Inflationary pressures in the domestic economy remain low against a background of tight liquidity conditions, weak domestic demand, depressed economic activity and weakening of the South African rand against the United States dollar.

Annual headline inflation increased somewhat for the first time in 6 months, having decelerated for the previous consecutive months to July 2013. Annual inflation rose from 1.25% in July 2013 to 1.28% in August

2013, on account of increases in non-food inflation. Non-food inflation surged from 1% in July 2013 to 1.44% in August 2013.

Annual food inflation declined to 0.94% in August, down from 1.74% in July 2013, largely due to falling prices of vegetables, milk, cheese and eggs; sugar, jam, chocolate and confectionery; and mineral waters, soft drinks, fruit and vegetable juices, as a result of improved supply of these items on the market.

Annual non-food inflation accelerated from 1% in July 2013 to 1.44% in August 2013, following increases in the price of alcoholic beverages and tobacco, transport, restaurants and hotels and housing, water, electricity, gas and other fuels.

Partly offsetting these increases were decreases in the price of communication on the back of stiff competition in the sector, which led to massive sales promotions to the benefit of the consumers.

Month-on-Month Inflation

Month-on-month inflation increased from -0.38% in July 2013 to -0.15% in August 2013, following increases in the prices of both food and non food categories.

Monthly food prices gained 0.24 percentage points to -0.9% in August 2013, from -1.14% in July 2013, despite the decline in prices of all other food and non-alcoholic beverages sub-groups.

Monthly food inflation soared, notwithstanding declines in categories such as vegetables, -2.58%; fruit, -1.72%; sugar, jam, honey, chocolate and confectionery, -0.91%; oils and fats, -0.85%; and milk, cheese and eggs, -0.80%.

Monthly non-food prices surged to 0.23% in August 2013, from -0.004% in July 2013, largely due to increases in the prices of electricity, gas and other fuels, 0.79%; recreational and cultural services, 0.08%; and transport, 0.07%.

Inflation Outlook

Inflation developments in the domestic economy, in the short to medium term, will continue to be influenced by movements international oil prices, price developments in South Africa, world food prices, as well as the level of domestic demand.

International food prices have, however, been on the decline since the beginning of 2013. According to Food and Agriculture Organisation (FAO), international cereals price index decreased by 10.1% during the period September 2012 to June 2013.

Domestically, the decline in international food prices has resulted in falling inflation, as prices of imported rice and wheat declined.

The low agriculture output experienced in 2013 is, however, likely to result in an increase in the price of mealie meal, from the last quarter of 2013 through to the end of first quarter 2014.

NATIONAL PAYMENTS SYSTEM DEVELOPMENTS

Zimbabwe Electronic Transfer Settlement System (ZETSS)

The value of transactions processed through the RTGS system in August 2013 decreased by 15% to US\$3.35 billion from US\$3.96 billion in July 2013. The volume of transactions also registered a decrease of 9%, from 205 854 to 187 747 over the same period.

Card Systems

The total value of card based transactions rose by 2.23%, from US\$334 million in July to US\$341.5 million in August 2013.

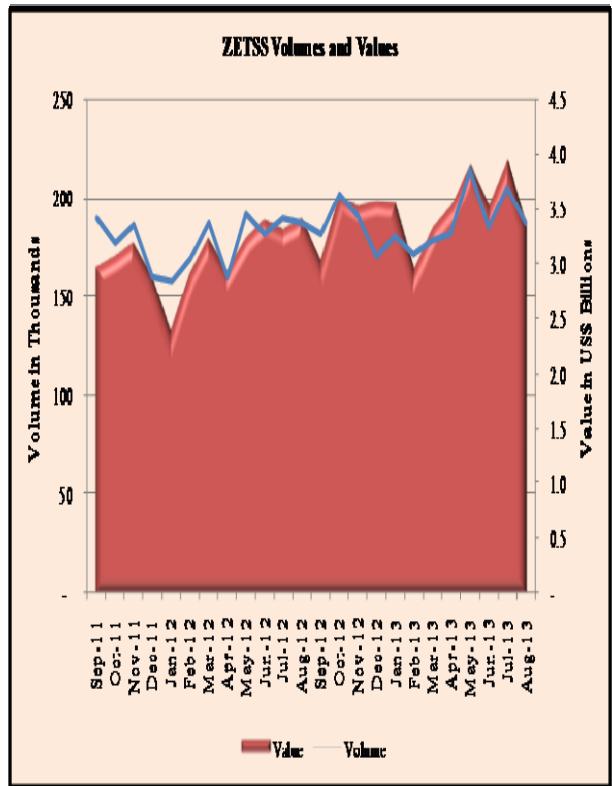

Mobile and Internet Based Transactions

The value of mobile and internet based transactions also increased by 4.93%, from

US\$303.20 million in July to US\$318.16 million in August 2013.

Cheques

In value terms, cheque transactions decreased from US\$12.30 million in July 2013 to US\$10.45 million in August 2013.
