STOCK MARKET DEVELOPMENTS

Global risk appetite was on a rise in February 2014 underpinned by better than expected earnings in most United States companies. This was so despite weak economic data being recorded in the US economy. With the exception of the Nigerian Stock Market, which registered a decline largely due to declines in banking counters, most African stock markets, including the Zimbabwe Stock Exchange (ZSE) registered positive performance in the period under review.

The key industrial index broke its declining trend and recovered by a marginal 0.11% between January and February 2014, ending February at 189.45 points, compared to

189.25 points in January. On a year to date basis, however, the industrial index lost 6.21%.

The mining index also recovered, to close the month under review at 39.24 points, up from 35.40 points in January. This increase reflected a 10.85% month-on-month gain, against a year-to-date loss of 14.30%.

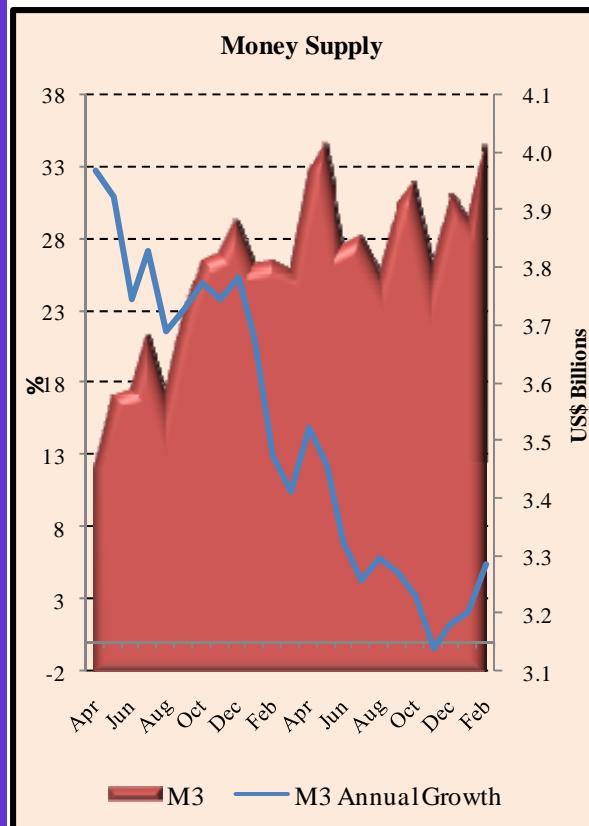

The volume of shares traded declined by 16.29%, from 162.64 points in January 2014 to 136.16 points in February 2014. Total turnover also declined by 55.33%, due to the absence of special bargain deals, to close the month under review at US\$25.82 million.

Market capitalization rose by 0.51% to US\$4.91 billion, at the end of February

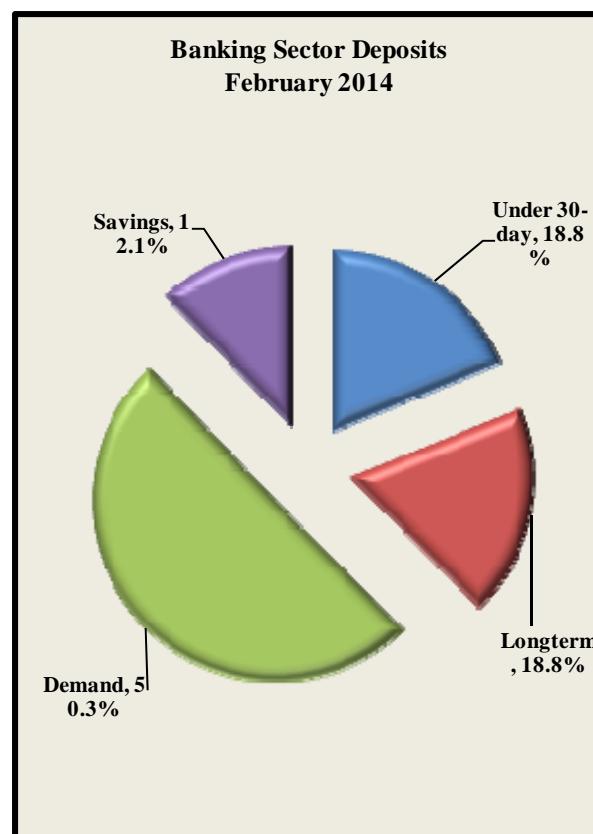

2014, from US\$4.89 billion at the close of January 2014.

MONETARY DEVELOPMENTS

The sluggish performance of the economy continued to hamper robust growth rates in the broad money. The main sources of liquidity under the multicurrency system are exports, external lines of credit and Diaspora remittances, given that the Central Bank cannot inject liquidity into the economy. These have not managed to generate enough liquidity to support economic activity and achieve desirable levels of money supply growth.

Consequently, broad money registered a modest 5.46% annual growth in February 2014, compared to 12.91% over the same period last year. This reflected an increase of US\$208.96 million in broad money, from US\$3 813.62 million in February 2013, to US\$4 021.78 million in February 2014. The growth in broad money was sustained by an expansion in aggregate deposits during the period under review.

Supported largely by inflows from parastatals and partly reflecting limited alternative low risk investments, long term deposits registered a 33.75% annual growth during the period under review. Over the same period, demand and savings deposits

recorded annual growths of 2.21% and 16.19%, respectively. Maturities in short term deposits resulted in this class of deposits declining by 11.07%, during the period of analysis.

On the sources side, annual broad money growth was mainly driven by bank credit to Government during the period under review. This was largely due to the Government's aggressive issuance of Treasury Bills and bonds through private placements.

These instruments are of varied tenors, ranging from 92 days to 1 461 days. Unanticipated declines in Government deposits also worsened the net credit to

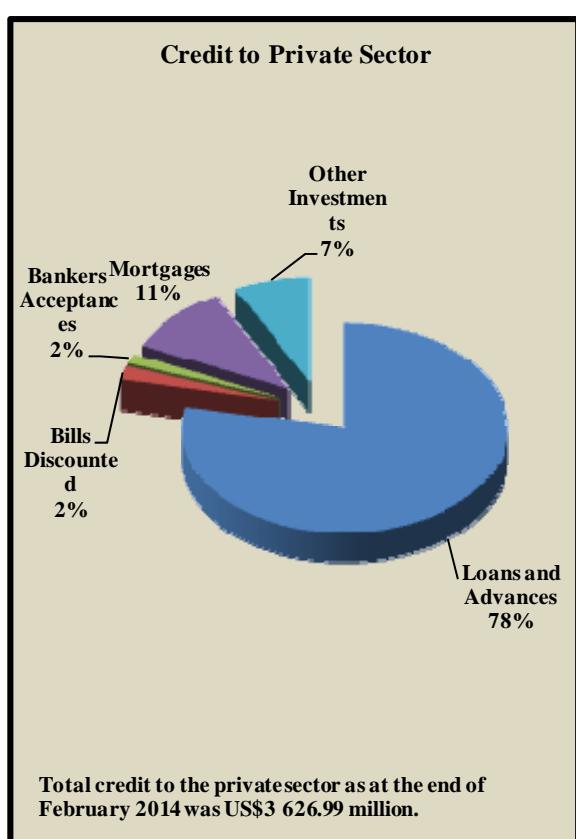

Government position. On an annual basis, Government deposits declined by 89.35% in December 2013, 3.60% in January 2014 and 0.89% in February 2014. Net credit to Government consequently rose from US\$153.16 million in February 2013 to US\$415.05 million by February 2014.

Growth in commercial banks' credit to the private sector fell significantly, from an annual growth of 28.77% in February 2013 to 1.50% in February 2014. Tighter credit policies, as a result of rising nonperforming loans, as well as a slowdown in the growth of the deposit base, resulted in a slump in private sector credit developments.

Claims on the private sector were in the form of loans and advances, 78.22%; mortgages advanced by building societies, 10.64%; bills discounted, 2.08%; bankers' acceptances, 1.54%; and other investments, 7.53%.

The outstanding loans and advances were mainly to households (19.40%); agriculture (19.26%); distribution (17.34%); and services (15.29%).

Credit to the private sector was mainly utilized for asset purchases (42.88%) as well as inventory build-up (34.12%). Loans and advances utilized for fixed investment activity have remained low, with the procurement of plant and equipment accounting for 3.82% and pre and post shipment financing at 0.83%, of total loans and advances.

INFLATION DEVELOPMENTS

Annual Inflation

The annual headline inflation decelerated to -0.49% in February, from 0.41% in January 2014, marking the onset of a deflationary economic environment. The decline was on account of a slowdown in both food and non-food inflation.

Annual food inflation slowed down to -3.26% in February, from -2.08% in January 2014, while non-food inflation also receded to 0.93% from 1.67% during the same period.

The decrease in annual food inflation was largely driven by sugar, jam, honey, chocolate and confectionery, vegetables, meat, fruits and mineral waters, soft drinks and fruit juices, fish and sea food, milk, cheese and eggs; oils and fats, as well as bread and cereals sub-categories.

Annual non-food inflation was driven by education; housing, water, electricity, gas and other fuels; hotels and restaurants; transport; alcoholic beverages and tobacco; and health services. The decline in annual non-food inflation can be attributed to the decreases in communication, recreation and culture, and furniture and equipment inflation.

Month-on-Month Inflation

Month-on-month inflation declined by 0.1 percentage points to 0.05%, from the January 2014 rate of 0.14%, following decreases in the prices of food and non-alcoholic beverages.

Monthly food inflation stood at 0.18% in February, down from 0.44% in January 2014. Decreases were recorded for sugar, jam, honey, chocolate and confectionery, oils and fats, and mineral waters, soft drinks and fruit juices items.

Monthly non-food inflation was -0.01% in February, up from -0.08% in January 2014.

Declines in the prices of water, electricity, gas and other fuels as well as furniture and equipment depressed non-food inflation in February 2014.

Inflation Outlook

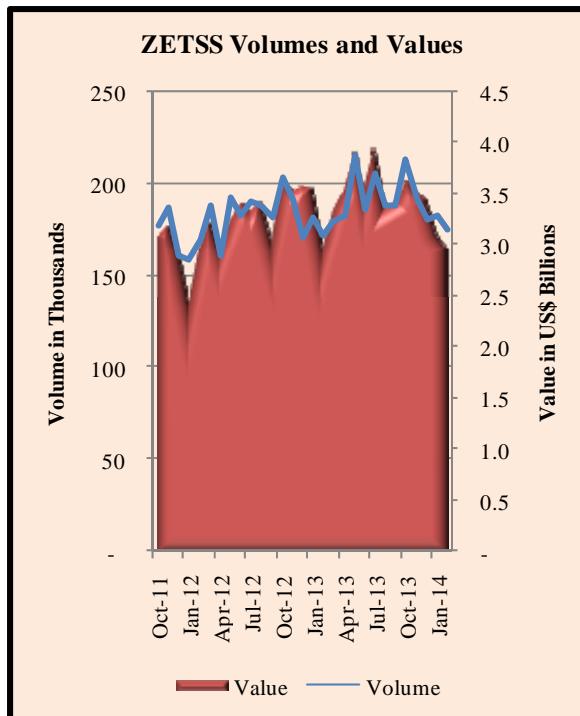

The rise in international oil prices from an average of US\$107.44 per barrel in January to about US\$108.69 per barrel in February 2014, if sustained, is expected to increase inflationary pressures in the economy.

However, the expected bumper harvest following a favorable agricultural season is expected to exert downward pressure on food prices from May 2014, with the effect of further reducing inflation.

NATIONAL PAYMENTS SYSTEM DEVELOPMENTS

Zimbabwe Electronic Transfer Settlement System (ZETSS)

The value of transactions processed through the RTGS system in February 2014 decreased by 4% to US\$3 billion, from US\$3.1 billion in January 2014, while the volume of transactions also registered a

decrease of 4% from 182 479 to 175 092 in the same period.

Card Systems

The total value of card based transactions decreased by 13.48% to US\$290.17 million in February 2014, from US\$335.36 million in January 2014.

Mobile and Internet Based Transactions

The value of mobile and internet based transactions decreased by 5.06%, from

US\$296.56 million in January 2014 to US\$281.56 million in February 2014.

Cheques

The value of cheque transactions, however, increased to US\$10.73 million in February 2014, from US\$5.24 million in January 2014.
