STOCK MARKET DEVELOPMENTS

During the month of October 2012, there was a rebound of activity on the ZSE. The industrial index firmed by 5.8% to 154.47 points. The upward movement was largely due to gains recorded in middle and small capitalised counters as investors perceived them to be under valued.

In addition, the latest financial statements showed that most listed companies recorded better than expected profits, giving rise to a surge in the demand for shares.

The mining index lost 2.4%, from 96 points in September to 93.66 points at the end of October 2012. Given the liquidity constraints in the economy, the mining sector has been unable to raise adequate capital for its operations.

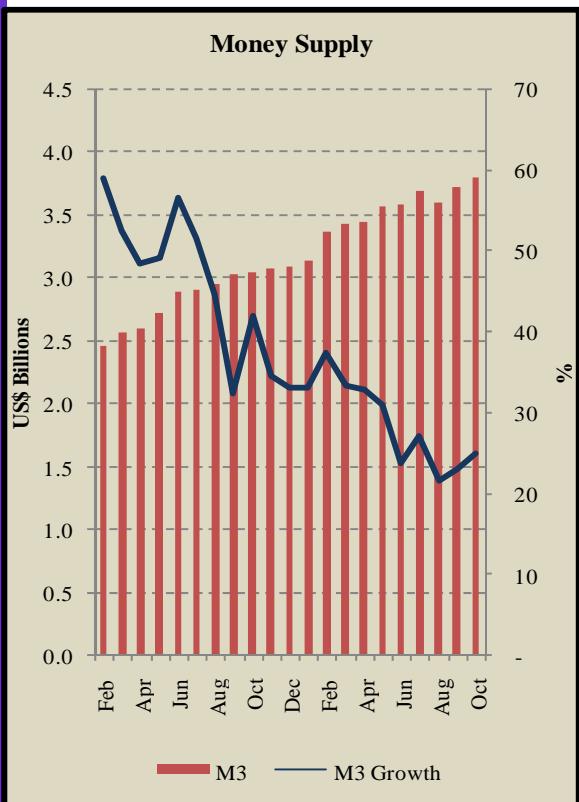

During the month of October, the value of shares traded rose to US\$37.9 million, from US\$30.2 million, representing a 25.5% increase. Turnover was largely driven by foreign investors. Net foreign purchases increased from US\$13.9 million in September to US\$14.5 million in October 2012.

Market capitalization rose by 4.7%, to US\$4 billion during the period under review. On a year-to-date basis, market capitalization registered an increase of 10.1%. Delta became the first company listed on the ZSE to reach a market capitalization of US\$1 billion, driven by strong demand for beverages.

MONETARY DEVELOPMENTS

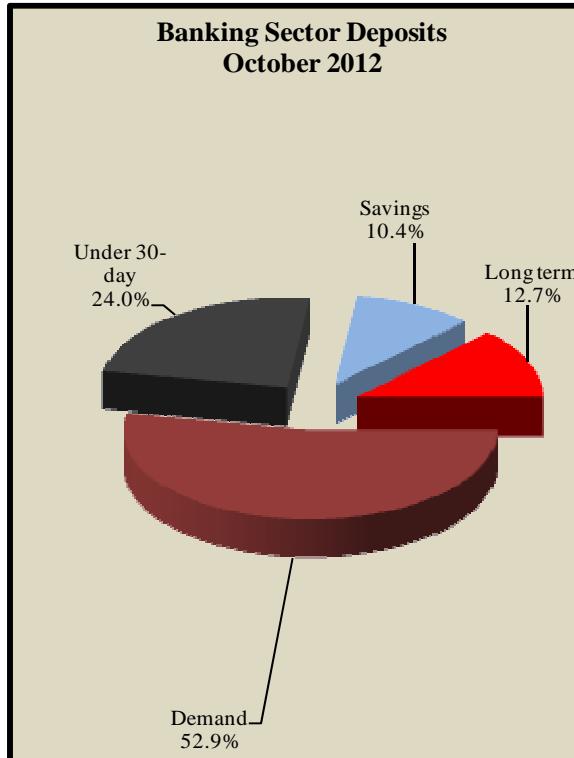

Annual growth in broad money supply rose to 24.9% in October 2012, from 23.1% in September. In absolute terms, broad money

increased from US\$3.7 billion in September to US\$3.8 billion in October 2012, representing a monthly expansion of 2.3% in total banking sector deposits.

Annual growth in broad money was largely driven by increases across all classes of deposits as follows: demand, 12.2%; savings, 42.9%; short term, 33.1%; and long term deposits, 67.2%.

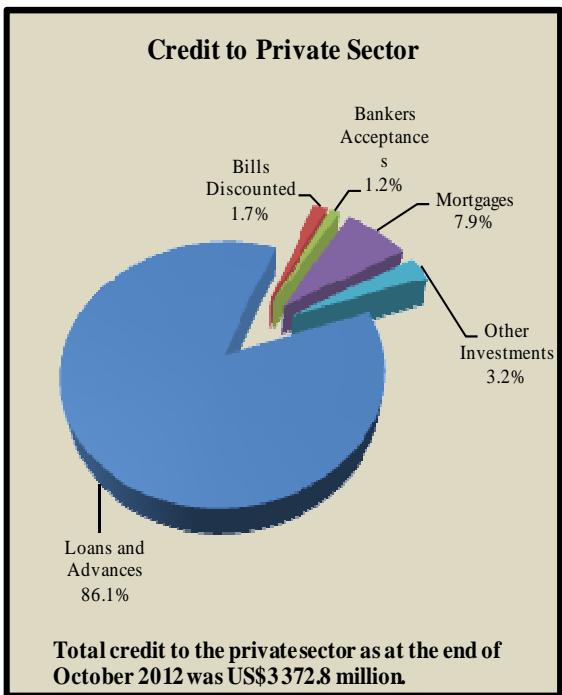

Annual growth in domestic credit decelerated, from 34.6% in July, to 30.1% in September and further to 29.4% in October 2012. The decline in domestic credit reflected the liquidity challenges currently prevailing in the economy.

Outstanding credit to the private sector amounted to US\$3 372.8 million, compared to US\$3 350.7 million in September 2012. Due to limited activity on the money market, the main driver of credit to the private sector was loans and advances.

Outstanding loans and advances were mainly extended to agriculture (21.7%), distribution (20%) and manufacturing (19.5%) activities. Households accounted for 13.2% of total loans and advances to the private sector.

Private sector loans and advances were mainly utilized for inventory build-up (39.2%) as well as recurrent expenditures (34.7%). Loans and advances utilized for fixed investment activity have remained low, accounting for 4.4%,

while pre and post shipment financing accounted for 2.6% of total loans and advances.

Net credit to Government, which is largely in the form of Government stocks issued in lieu of banks' statutory reserves, rose from US\$73.2 million in September to US\$80.2 million in October 2012, largely reflecting the issuance of 91-day Treasury bills during the month under review.

INFLATION DEVELOPMENTS

Annual Inflation

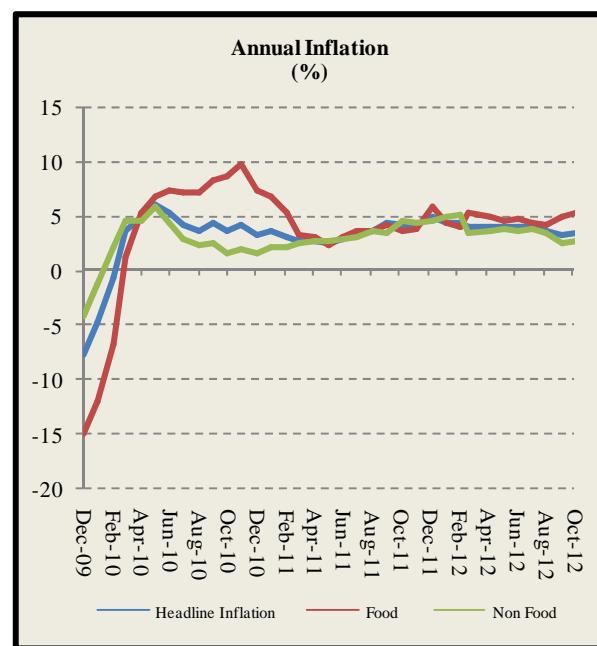

The annual headline inflation accelerated to 3.38% in October 2012, from 3.24% in September 2012, driven by both food and non-food inflation.

Annual food inflation rose to 5.2% in October, up from 4.8% in September 2012, while non-food inflation increased by 0.03 percentage points, from 2.55% to 2.58% during the same period.

Annual food inflation was largely driven by increases in the prices of meat, bread and cereals, vegetables and fish. The increase in non-food inflation was mainly attributed to housing, water, electricity, gas, rentals and other fuels; among other categories.

Month-on-Month Inflation

Month-on-month inflation declined to 0.26% in October 2012, from 0.46% in September 2012, driven by declines in both food and non-food items.

Monthly food inflation decelerated to 0.46% in October, from 1.08% in September 2012, while monthly non-food inflation eased to 0.17% in October 2012, from 0.19% in September 2012.

Inflation Outlook

Inflation developments in the economy for the medium to long term will continue to be influenced by the US\$/rand exchange rate, international oil prices, world food prices and pricing of utilities.

NATIONAL PAYMENTS SYSTEM DEVELOPMENTS

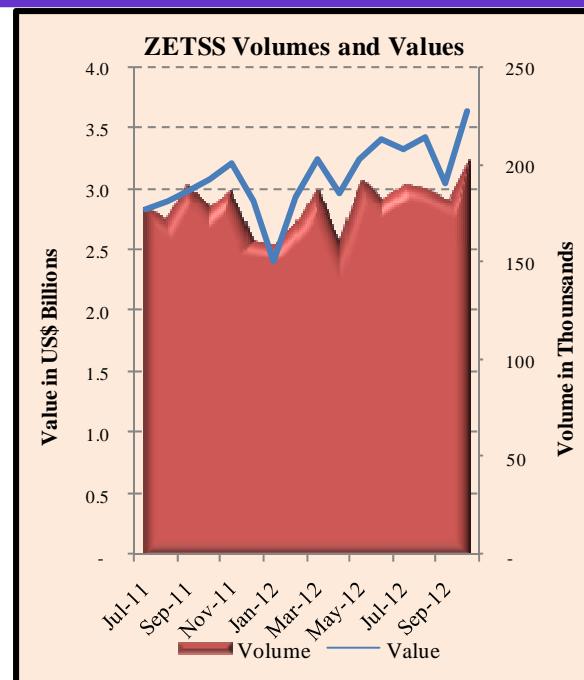

During the month of September 2012, transactional activities in both large value and retail payment streams registered significant increases.

Zimbabwe Electronic Transfer Settlement System (ZETSS)

The value and volume of transactions processed through the RTGS system increased from US\$3 043 million and 182 thousand in September 2012 to US\$3 630 million and 203 thousand in October 2012, representing an increase of 19% in value terms and 12% in volumes, respectively.

Card Systems

The total value of card based transactions decreased by 1.1%, from US\$235.5 million

in September to US\$232.9 million in October 2012.

Mobile and Internet Based Transactions

The total value of mobile and internet based transactions increased by 32% to US\$196.9 million in October 2012, from US\$149.2 million recorded in September 2012.

Cheques

The total value of cheque transactions increased by 17.9%, from US\$5.6 million in September to US\$6.6 million in October 2012.
