STOCK MARKET DEVELOPMENTS

During September 2012, trading on the Zimbabwe Stock Exchange (ZSE) recovered partly due to the increased participation of local pension funds and renewed interest from foreign investors.

The volumes traded, rose from 194.7 million in August to 287.8 million shares in September 2012. The value of shares traded also registered a 31% increase, from US\$23.1 million in August to US\$30.2 million in September 2012.

Net purchases by non-residents, which accounted for 48% of total turnover, surged from US\$0.83 million in August to US\$14.5 million in September 2012.

As a consequence of the above developments, the industrial index gained 10.4% to

close the month at 146 points. On a year-to-date basis, the industrial index has gained 0.9%.

The mining index also registered gains of 7.8% in September 2012. On a year-to-date basis, the mining index lost 6%.

Total market capitalization rose by 11.3%, from US\$3.43 billion in August to US\$3.82 billion in September 2012. On a year-to-date basis, market capitalization registered an increase of 4.4%.

MONETARY DEVELOPMENTS

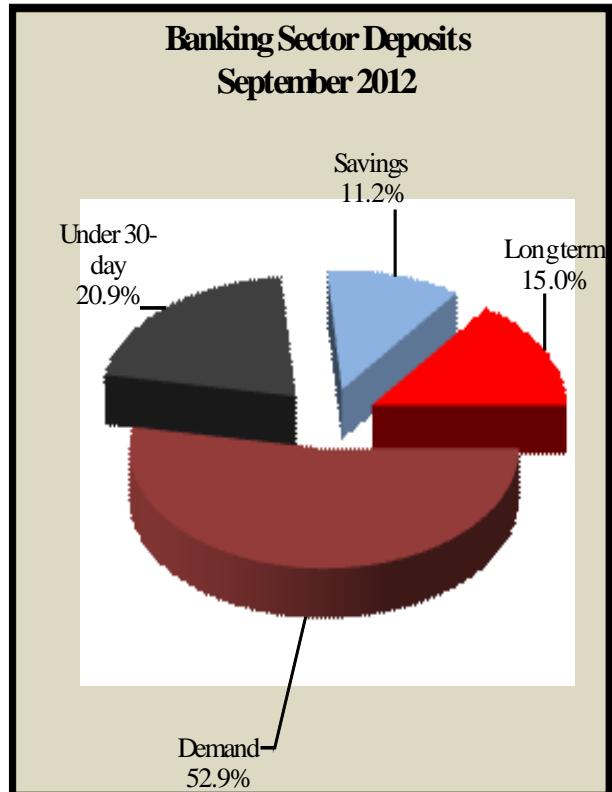

Broad money, which consists of consolidated deposits in the banking system, increased from US\$3 589.3 million in August to US\$3 728.3 million in September 2012. The month

-on-month money supply has been on an upward trend save, for the month of August where it recorded a marginal decline of 2.9%.

Lending to the private sector increased from US\$3 274 million in August to US\$3 350.7 million in September 2012. Month-on-month, however, growth in credit to the private sector has been slowing reflecting the limited lending capacity of banks owing to the liquidity constraints.

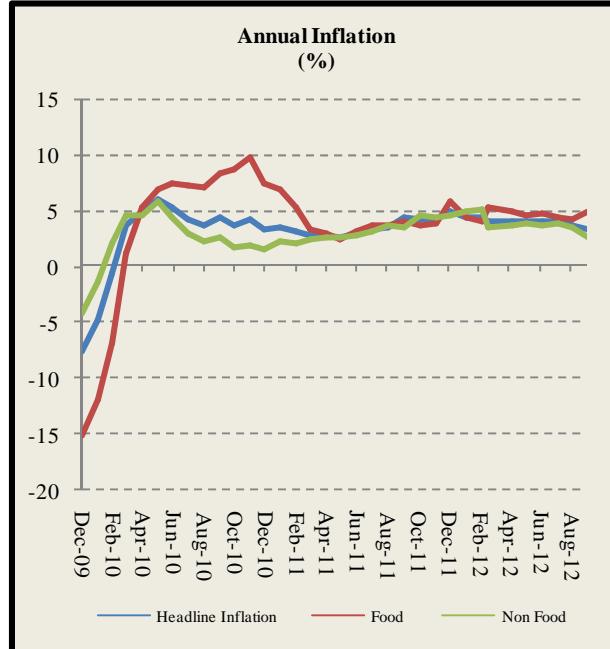

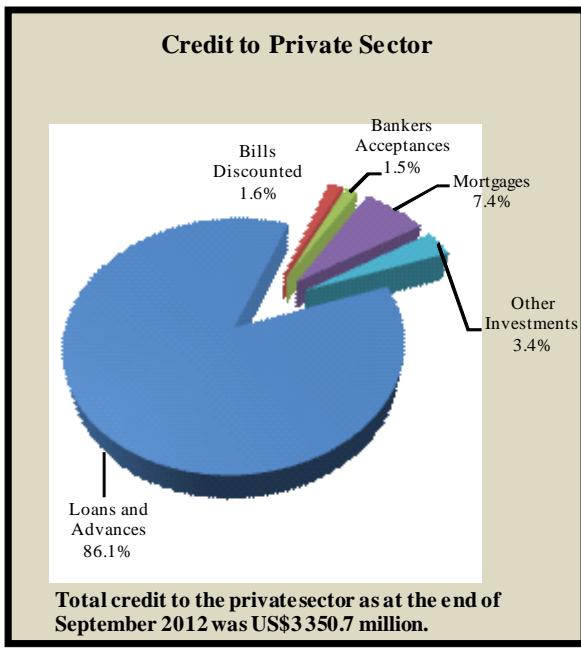

The low growth in money supply and consequently wide spread liquidity challenges, are underpinned by poor performance of the external sector. Since the adoption of the

multicurrency system, growth in money supply has been largely a function of export proceeds.

Lending by banks has largely been short term in nature and towards the financing of recurrent expenditures. Against this background, over 70% of the loans and advances from the banking sector were extended towards financing working capital and recurrent expenditures.

The distribution of credit remains skewed towards the individuals and services sectors. Loans to individuals have become significant as most banks are offering salary-based loans to employees.

Owing to the tight liquidity environment and high credit demand, lending rates remained relatively high, ranging from around 8% to around 30%.

Time deposit rates averaged 10.75%. A trend has emerged, however, where bigger banks tend to quote relatively lower deposit rates, compared to rates quoted by smaller banks with a high appetite for liquidity.

INFLATION DEVELOPMENTS

Annual Inflation

Annual headline inflation declined for the fifth consecutive month to 3.24% in September 2012, down from 3.63% in August 2012, due to a slow down in annual non-food inflation.

The low and decreasing inflation scenario is, in large part, explained by the shrinking industrial production, as well as declining national disposable income.

Year-on-year, food inflation increased from 4.20% in August 2012 to 4.80% in September 2012. Non-food inflation, however, declined from 3.38% in August 2012 to 2.55% in September 2012, resulting in the overall decline in annual inflation.

The contribution of food inflation to annual inflation increased, from 1.34% in August 2012, to 1.53% in September 2012, on account of increases in the prices of meat and bread and cereals.

Bread and cereal prices increases could be partly explained by constrained supply of wheat on the local market. A Statutory Instru-

ment has, however, been issued, which reduced the excise duty on wheat imports and lowered the landed price of wheat.

The slow down in price increases for housing, water, electricity, gas and other fuels; alcoholic beverages and tobacco; furniture, household equipment and maintenance contributed to the deceleration of annual non-food inflation.

Month-on-Month Inflation

Month-on-month inflation rose from -0.18% in August 2012 to 0.46% in September 2012, largely on account of increases in prices of food items.

Monthly food inflation stood at 1.08% in September 2012, up from -0.11% in August 2012, on the back of increases in all food subcategories.

Monthly non-food inflation stood at 0.19% in September 2012, up from -0.21% in August 2012.

Inflation Outlook

The rise in international oil prices in the last four months is expected to put upward pressure on pump prices and hence on inflation.

The South African rand, which has come under pressure as a result of countrywide strike and other investor concerns with the South African economy, is likely to continue weakening. A weaker rand would dampen infla-

tionary pressures in the Zimbabwean economy.

NATIONAL PAYMENTS SYSTEM DEVELOPMENTS

During the month of September 2012, transactional activities in both large value and retail payment streams remained relatively stable.

Zimbabwe Electronic Transfer Settlement System (ZETSS)

The value and volume of transactions processed through the RTGS system decreased, from US\$3.417 billion and 187 thousand in August 2012 to US\$3.043 billion and 182 thousand in September 2012, representing a decrease of 11% in value terms and 3% in volumes, respectively.

Card Systems

The total value of card based transactions increased by 7.8%, from US\$218.4 million in August to US\$235.5 million in September 2012. Of the card payments, 69.5% were processed through ATMs, whilst 30.5% were processed through Point of Sale machines.

Mobile and Internet Based Transactions

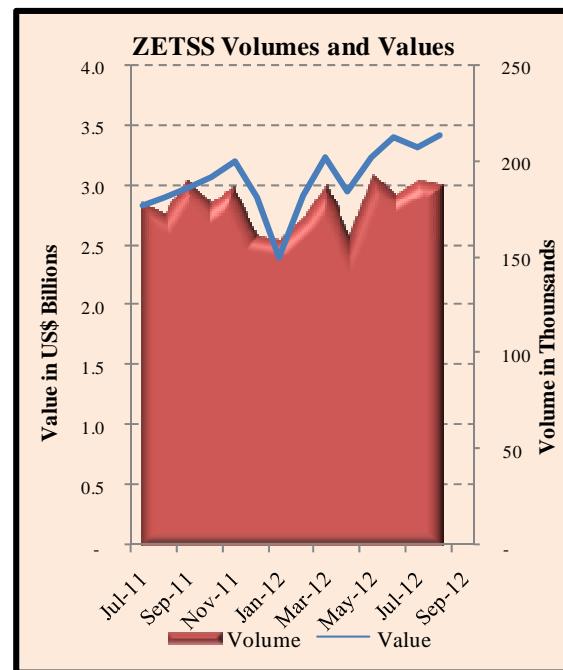

The total value of mobile and internet based transactions increased by 51.8% to US\$149.2 million in September 2012, from

US\$98.3 million recorded in August 2012.

Cheques

The total value of cheque transactions declined by 8.2%, from US\$6.1 million in August to US\$5.6 million in September 2012.
