1. OVERVIEW

Global growth is estimated at 3.1% in 2023 and is projected to remain at 3.1% in 2024 before rising to 3.2% in 2025. On the upside, factors such as faster disinflation could lead to a further easing of financial conditions. On the downside, new commodity price spikes from geopolitical shocks and supply disruptions could prolong tight monetary conditions.

On the domestic front, economic activity picked up during the last quarter of 2023, particularly in mining, tourism, construction, and electricity as well as in the information, communication, and technology sectors. Headline inflation rose from 18.4% in September 2023 to 26.5% in December 2023.

Reflecting positive domestic developments, merchandise exports rose to US\$2,063.8 million during the fourth quarter of 2023, from US\$1,810.4 million recorded in the corresponding quarter in 2022. Similarly, the country's merchandise imports increased by 8.8% to US\$2,550.1 million, from US\$2,342.8 million during a similar period. Resultantly, the country's trade deficit narrowed from US\$532.4 million in the last quarter of 2022 to US\$486.3 million in the fourth quarter of 2023.

Broad money stock (M3) stood at ZW\$18 914.59 billion in December 2023, compared to ZW\$15 714.07 billion recorded in September 2023. Foreign currency deposits accounted for 75.48% of broad money, followed by local currency deposits, at 24.46%; while currency in circulation constituted the balance of 0.07%.

The Zimbabwe Stock Exchange (ZSE) recovered from the previous quarter's loss. All indices registered gains. Performance on the Victoria Falls Stock Exchange (VFEX), was, however, subdued as the All-Share index lost 5.2% to close the year at 70.6 points, from 74.5 points recorded in the previous quarter.

The value of electronic transactions processed through the National Payment Systems (NPS) during the fourth quarter of 2023 increased by 33% to ZW\$112.15 trillion from ZW\$84.55 trillion recorded in the previous quarter. Similarly, NPS volumes increased by 18% to 198.17 million from 167.41 million during the same period.

2. INTERNATIONAL DEVELOPMENTS

The global economy is estimated to have grown by 3.1 percent in 2023 and is projected to remain at 3.1 percent in 2024. The subdued economic growth is due to the decision by most central banks to increase interest rates to combat inflation, the reduction in fiscal support given the burden of high debt, and sluggish growth in underlying productivity. On the inflation front, global headline inflation declined from 6.9 percent in 2023 to 5.8 percent in 2024. Restrictive monetary policy is envisaged to play a significant role in the reduction of global inflation.

Table 1 shows the global and regional economic growth rates and outlook.

Growth in 2023 for advanced economies was estimated at 1.6% and projected at 1.5% in 2024. This revision was driven by stronger-than-expected growth in the second half of 2023 by the United States, which was partially offset by weaker growth in the Euro area. The Euro area is expected to experience an increase in growth, from 0.5% in 2023 to 0.9% in 2024 and further to 1.7% in 2025. Similarly, the United Kingdom is anticipated to see a modest growth rise, from 0.5% in 2023 to 0.6% in 2024, as the adverse effects of high energy prices diminish.

Source: IMF World Economic Outlook (WEO): January 2024 Update

Growth in emerging markets and developing economies is expected to remain at 4.1% in 2024.

Growth in Russia is anticipated at 2.6 percent in 2024, largely on account of high military spending and private consumption, supported by wage growth in a tight labour market.

Growth in sub-Saharan Africa is projected to increase from an estimated 3.3 percent in 2023 to 3.8% in 2024. The growth will mainly be driven by improvements in external conditions and falling inflation in the region.

Downside risks to global growth remain elevated amid the conflict in Gaza, which could escalate further into the wider region, The Middle East produces about 35 percent of the world’s oil exports and 14 percent of its gas exports. Additionally, persistent core inflation, faltering growth in China, and a disruptive turn to fiscal consolidation could also negatively affect global growth.

INTERNATIONAL COMMODITY PRICE DEVELOPMENTS

International commodity prices for most commodities softened during the fourth quarter of 2023, except for gold prices. A stronger U.S. dollar largely weighed down international commodity prices on the global market. Table 2 shows the developments in prices of selected commodities, during the quarter under analysis.

Precious Metals

Gold prices rose by 2.3%, from an average of US\$1,929.19 per ounce in the third quarter of 2023 to US\$1,974.33 per ounce in the fourth quarter of 2023. The prices of the precious metal rose on prospects that the Federal Reserve would begin lowering interest rates in early 2024.

Platinum prices retreated by 1.9% to US\$913.32 per ounce during the fourth quarter of 2023, from US\$931.27 per ounce recorded in the prior quarter. Platinum prices remained subdued, due to low industrial demand prospects emanating from a slowdown in manufacturing activities.

Palladium prices significantly declined by 14.8%, from US\$1,248.65 per ounce during the third quarter to US\$1,064.41 per ounce, during the fourth quarter of 2023. The drop in palladium prices was attributable to strong investor perception of excess palladium supply, in the face of weakening global demand.

The developments in precious metal prices for the period from December 2022 to December 2023 are shown in Figure 1.

Figure 1: Precious Minerals Prices (US\$/ounce): December 2022 – December 2023

Base Metals

During the fourth quarter of 2023, copper prices decreased by 1.8%, from US\$8,404.80 per tonne during the third quarter of 2023 to US\$8,251.34 per tonne. The retreat in copper prices was primarily driven by weak global growth prospects in 2023 and 2024.

Nickel prices retreated by 15.3%, from an average of US\$20,616.49 per tonne during the third quarter of 2023 to US\$17,457.10 per tonne, during the quarter under analysis. Figure 2 depicts developments in base metal prices in 2023.

Figure 2: Base Metal Prices (US\$/tonne): December 2022 – December 2023

Lithium

Lithium prices recorded a sharp decline of 42.4%, from an average of US\$35,924.82 per ounce during the third quarter of 2023 to US\$20,702.31 per ounce during the fourth quarter of 2023. The decline was attributable to weaker demand for electric cars in China and other markets. Figure 3 depicts developments in lithium prices from February to December 2023.

Figure 3: Lithium Prices (US\$/tonne): February – December 2023

Brent Crude Oil

Brent crude oil prices receded slightly in the last quarter of 2023, underpinned by weak global economic data. This is despite the potential of the Israel-Palestine war erupting into a broader regional conflict. Crude oil prices declined by 3.5%, to an average of US\$82.81 per barrel in the fourth quarter of 2023, as shown in Figure 4.

MERCHANDISE TRADE DEVELOPMENTS

On a quarter-on-quarter basis, the country’s total merchandise trade grew by 6.9%, to US\$4,613.9 million in the fourth quarter, from US\$4,314.6 million in the third quarter of 2023, underpinned by growth in both exports and imports.

Figure 5 shows total merchandise trade developments during the fourth quarter of 2022 and 2023 and the third quarter of 2023.

Figure 5: Quarterly Merchandise Total Trade (US\$m)

Source: Zimstat, 2023

Similarly, compared to the same quarter of 2022, total merchandise trade increased by 11.1%, from US\$4,153.2 million. The notable growth in total merchandise trade was attributed to the increase in the country's merchandise exports and imports.

Merchandise Export Developments

Merchandise exports amounted to US\$2,063.8 million during the fourth quarter of 2023, up by 6.9% from the US\$1,931.1 million realized in the preceding quarter. Compared to the corresponding quarter in 2022, the country’s merchandise exports rose by 14.0%, from US\$1,810.4 million. The quarterly export developments are shown in Figure 6.

Figure 6: Quarterly Merchandise Exports in US\$ million

Source: Zimstat, 2023

The growth in merchandise exports during the fourth quarter of 2023 was primarily driven by the growth in tobacco exports. On the contrary, mineral exports remained subdued in the same quarter, weighed down by depressed global commodity prices. In addition, the slowdown in gold deliveries to Fidelity Refiners during the fourth quarter had a knock-on effect on gold exports. Similarly, manufactured exports were generally subdued largely due to a combination of domestic supply-side rigidities and international competitiveness factors. Table 3 shows developments in the country's exports for the third and fourth quarters of 2023.

Major Merchandise Export Destinations

During the quarter under review, most of the country's exports were shipped to China and the United Arab Emirates, absorbing 28.7% and 24.5% of the country's total exports, respectively. In the Southern African Development Community (SADC) region, South Africa accounted for 22.5% of the country's exports, Mozambique, 5.6% and Zambia 2.9% during the period under review. Figure 7 shows the country's top export destinations, during the quarter under analysis.

Merchandise Import Developments

The country’s merchandise imports during the quarter of 2023 stood at US\$2,550.1 million, up by 7.0%, from the US\$2,383.5 million recorded in the third quarter of 2023. Compared to the fourth quarter of 2022, the country’s import bill increased by 8.8%, from US\$2,342.8 million. Figure 8 shows merchandise import developments for the fourth quarters of 2022 and 2023 and the third quarter of 2023.

Figure 8: Quarterly Merchandise Imports (US\$ million)

The country’s imports were primarily dominated by energy imports, particularly diesel and petrol. Food imports also contributed a significant portion of the fourth quarter import bill. Table 4 shows quarterly merchandise import developments by commodity for the third and fourth quarters of 2023.

Table 4: Quarterly Merchandise Imports (US\$ million)

Major Import Sources

The country’s imports for the fourth quarter of 2023 were mainly sourced from South Africa (37.9%), China (11.5%), Bahrain (7.6%), as shown in Figure 9.

TRADE BALANCE

The country’s trade balance widened from a deficit of US\$452.4 million in the third quarter of 2023 to a deficit of US\$486.3 million, during the reporting quarter. Relative to the corresponding quarter in 2022, the country’s trade deficit narrowed from US\$532.4 million to US\$486.3 million in the reporting quarter. Figure 10 depicts the country’s trade balances for the fourth quarter of 2022 and the third and fourth quarters of 2023.

3. DOMESTIC ECONOMIC DEVELOPMENTS

REAL SECTOR DEVELOPMENTS

During the fourth quarter of 2023, economic activities picked up, particularly in mining, tourism, construction, electricity and Information and Communication Technology sectors.

AGRICULTURE

The agriculture sector is estimated to have grown by 11.1% in 2023, supported by strong positive performance in the crop subsectors such as tobacco, wheat, and cotton. The livestock subsector is also anticipated to have grown moderately with output growth across most livestock classes.

Rainfall outturn

According to the Meteorological Services Department (MSD), the first half of the 2023/24 season was characterised by late onset of effective rainfall, resulting in late planting of crops in most areas of the country. This was despite the early rains received in October 2023, which were poorly distributed in space and time.

The MSD maintained a forecast of average to below average rainfall across the whole country for the second half of the season.

Tobacco

By the end of December 2023, the area planted under tobacco was estimated at 103 652 hectares, 4.82% lower than the 108 897 hectares planted by the same period in 2022. This was partially attributable to the late onset of the rains resulting

in the late establishment of the crop. The irrigated crop at 19 202 hectares accounted for about 18.53% of the total area planted. Table 5 shows the area planted by year-end in 2022 and 2023.

Livestock

The livestock sector performed significantly better in 2023 compared to 2022, determined by the increased animal slaughter figures from registered abattoirs.

Table 6 shows cumulative formal sector slaughters of cattle; pigs; and sheep and goats in 2022 and 2023.

Table 6: Cumulative Livestock Slaughters in 2022 and 2023.

Variance	7.43	5.76	7.81

Source: Ministry of Lands, Agriculture, Fisheries, Water, and Rural Development, 2024.

The improvement in meat output across all livestock classes was attributed in part to ready availability of grazing, feeds and water and improvement in disease management by farmers. The persistently high cost of stock feeds,

however, continues to impact negatively on livestock enterprises viability.

Cattle

During the fourth quarter of 2023, a total of 95 170 cattle were slaughtered at formal abattoirs, 8.77% up from the 87 500 head slaughtered in the same period in 2022. The slaughters were also 2.24% above the performance of the third quarter of 2023. The increase in slaughters was attributed to forced offtake in anticipation of the forecasted El-Nino induced drought in the 2023/24 season. Table 7 shows the quarterly cattle slaughters in 2022 and 2023.

Table 7: Quarterly Cattle Slaughters

Pigs

Pig slaughters during the fourth quarter of 2023 stood at 62 516 head an increase of 4.87% from the performance in the preceding quarter and rising by 2.45% from the same period in 2022. The fourth quarter production brought cumulative slaughters to 242 288 heads in 2023, up 5.76% from pig slaughters in 2022. Table 8 shows the formal sector pig slaughter trends in 2022 and 2023.

Milk Production

Fresh milk output has registered progressive quarter-on-quarter growth since 2022, with output in the last quarter of 2023 reaching 27.91 million litres, from 26.01 million litres in the preceding quarter. The 2023 fourth-quarter output also compares favourably to the 24.54 million litres produced in the last quarter of 2022. Figure 11 shows the quarterly milk output trend since 2021.

Figure 11: Quarterly Fresh Milk Output (litres)

The consistent positive performance of the dairy sector is attributed to fruition of investment in the

sector through various initiatives by government and development partners aimed at increasing the size of the dairy herd and improving cow productivity.

MINING

The mining sector registered mixed performance during the last quarter of 2023, compared to both the preceding quarter and the comparable quarter in 2022. Key minerals namely lithium, chrome, diamonds, and cobalt showed strong performance when compared to the previous quarter, while gold, platinum, palladium, and nickel underperformed.

Table 9 shows mineral performances for 2023 by quarters.

Gold

Gold output in the last quarter of 2023 stood at 8,197.50 kgs, which was 5% lower than the 8,601.77 kgs produced in the third quarter of 2023. Output for the fourth quarter of 2023 was also 19% lower than the corresponding quarter in the previous year. Cumulative gold deliveries to FPR from the second to the fourth quarter in 2023 are shown in Table 10.

Table 10: Cumulative Gold Deliveries to FPR for 2023 (kgs)

	Q2	Q3	Q4	Total
Primary producers/kg	3,005.54	3,109.74	2,815.49	11,445.21

Total	7,986.94	8,284.87	7,640.81	30,106.71

Source: FPR, 2024

During the fourth quarter of 2023, small-scale producers accounted for 62% of gold deliveries whilst primary producers accounted for 38%.

Platinum Group of Metals (PGMs)

PGM output recorded mixed growth with Platinum and Rhodium recording marginal gains while palladium recorded a decline during the fourth quarter of 2023 compared to the third quarter of 2023. Figures 12 and 13 shows trends in output from major PGMs from the fourth quarter of 2022 to the fourth quarter of 2023.

Figure 12: Quarterly Trends in Platinum and Palladium Output

Source: Ministry of Mines, 2024

Rhodium output amounted to 421.56 kgs in the fourth quarter of 2023 from 419.66 kgs realised in the third quarter of 2023. This also represents a 4% increase from 405.26 kg produced during the corresponding quarter in 2022.

Figure 13: Quarterly Trends in Rhodium Output in Kgs

Source: Ministry of Mines, 2024

Despite the threats of declining revenues due to depressed commodity prices, platinum mining houses remain steadfast in their investments to support mine development, exploration and improvement in operational efficiency to sustain PGMs output.

Notable investments by platinum houses during the quarter under review included establishment of new concentrator plant, refurbishment of plants, construction of solar power plants, construction of furnaces and storage facilities.

Nickel

Nickel output at 3,881.53 tonnes in the last quarter of 2023, was 16.4% lower than the output produced in the third quarter of 2023, as shown in Figure 14.

Figure 14: Quarterly Trends in Nickel Output (mt)

Source: Ministry of Mines, 2024

Nickel production benefited from PGMs who ramped up production on account of low international prices in a bid to mitigate against falling revenues.

Diamond

Diamond output for the fourth quarter of 2023 at 1.229 million carats was 18.7% up from 1.035 million carats produced during the third quarter of 2023. However, this was 19.5% lower than the

fourth quarter of 2022 production, as shown in Figure 15.

Figure 15: Quarterly Trends in Diamond Output, measured in Carats: 2022-2023

Source: Ministry of Mines, 2024

Diamond benefitted from the ramping up of production driven by increased investments in mining and processing capacity.

Chrome

Chrome ore output amounted to 344 941.7 tonnes, surpassing output in the comparable period in 2022 and in the third quarter of 2023 by 87.4% and 38.9% respectively. Increase in production of chrome ore was largely driven by higher demand of the mineral in the fourth quarter of 2023 and improved international prices compared to previous periods. Figure 16 shows development in the chrome ore output performance.

TOURISM

Growth in the tourism sector during the fourth quarter of 2023 was mainly on account of increased tourist arrivals from the region owing to the ongoing global tourism recovery and improved accessibility to Zimbabwe.

Tourist Arrivals

Tourist arrivals in Zimbabwe grew by 4.13% during the fourth quarter of 2023 from 494 878 during the third quarter of 2023 to 515 336 in the fourth quarter of 2023. The increase was due to rebound in global travel, which had seen recovery in tourism from COVID, as shown in Table 11.

Table 11: Quarterly Tourist arrivals

	Q1:2023	Q2:2023	Q3:2023	Q4:2023

During the fourth quarter of 2023, the highest numbers of tourist arrivals were from Africa. Arrivals from Europe improved by 11.68% from 66 482 during the third quarter to 74 252 during the fourth quarter of 2023. Arrivals from America and Middle East, during the fourth quarter of 2023, however, declined by 1.76% and 32.05%, respectively.

Monthly tourist arrivals were consistently higher in 2023 compared to 2022 as depicted in Figure 17.

Tourism Receipts

Tourism receipts are estimated to have risen by 57% from US\$272.26 million in the third quarter of 2023 to US\$428.42 million in the fourth quarter of 2023. The positive trend was reflective of the rise in arrivals in major source markets. Figure 18 shows the trend in monthly tourism receipts in 2023.

ELECTRICITY

Power generation during the fourth quarter of 2023 surged by 27.3% to 2 222.7 GWh from 1 745.7 GWh recorded in the same period in 2022. This increase was partially attributed to the recently expanded Hwange power station (Hwange units 7 and 8) and the partial increase in production by Independent Power Producers (IPPs).

The major contributors of power generation during the quarter under review were Hwange Power Station, Kariba and IPPs with 51.31%, 43.06% and 4.18% respectively. Table 12 shows power production statistics from the major power stations and IPPs in 2023.

Energy mix

Electricity generation from hydropower plants declined to 693.1GWh during the fourth quarter from 1 107.98GWh during the previous quarter, due to a decline in water levels at Kariba. On the contrary, thermal power output increased by 9.3% from 660.6GWh in the third quarter of 2023 to 666.7GWh in the fourth quarter of 2023.

INFLATION DEVELOPMENTS

Headline inflation increased from 18.36% in September 2023 to 26.52% in December 2023. Inflationary pressures emanated from depreciation of local currency and higher mark-ups during the festive season.

Annual food inflation accelerated from 23.12% in September 2023 to 38.26% in December 2023. The rise in food prices was partially attributed to the short supply of grain during the fourth quarter of 2023.

Annual non-food inflation also increased from 16.3% in September 2023, to 21.52% in December 2023. The increase in non-food inflation mainly reflected adjustments in administered prices for housing, water, electricity, gas and other fuels, transport, and communication subsectors. Figure 20 shows the annual inflation developments since June 2022.

Monthly inflation increased during the fourth quarter of 2023, rising from 0.95% in September 2023 to 4.70% in December 2023. The increase in monthly inflation was largely driven by the food component which rose from 1.05% to 8.64% over the same period. Figure 21 shows the monthly inflation developments since December 2021.

4. MONETARY DEVELOPMENTS

Broad money stock (M3) stood at ZW\$18 914.59 billion in December 2023, compared to ZW\$15 714.07 billion recorded in September 2023. The growth reflected quarterly expansion of ZW\$1 949.85 billion (72.52%) and ZW\$1 250.67 billion (9.60%) in local currency and foreign currency components of broad money, respectively.

Foreign currency deposits accounted for 75.48% of broad money, followed by local currency deposits, at 24.46%; while currency in circulation constituted the balance of 0.07%. Figure 22 shows developments in the components of broad money and annual growth rates.

Domestic Credit

Domestic credit registered a quarter-on-quarter growth of 26.57%, from ZW\$13 243.83 billion in September 2023 to ZW\$16 814.57 in December 2023. The growth was largely driven by an increase of ZW\$2 180.77 billion in net claims on Government, from a position of ZW\$2 606.21 billion in September 2023 to ZW\$4 786.98 billion. Credit to the other sectors of the economy increased, from ZW\$10 678.59 billion to ZW\$12 027.59 billion, during the period under review.

Households and agriculture accounted for 25.91% and 14.34% of the outstanding total credit to the private sector, respectively. The manufacturing and distribution sectors received 15.64% and 11.36% of the total credit, respectively. Private sector credit shares by economic sectors are shown in Figure 23.

Figure 23: Distribution of Private Sector Credit.

Credit to the private sector was largely utilized for

recurrent expenditures, 38.91%; inventory build-up, 24.12%; and fixed capital investments, 13.58%.

Interest Rates

During the quarter ending December 2023, nominal lending rates quoted by banks on local currency-denominated loans ranged between 75% and 155% during the fourth quarter of 2023. Time deposit rates for 90-days, 360-days averaged 56.03% and 66.07%, respectively. The savings rates were quoted between 30% and 50%, during the period under review, as shown in Figure 24.

Figure 24: Interest Rates on Local Currency Financial Assets (%)

Lending rates for foreign currency denominated loans advanced to individuals ranged between 7.00% and 18.00% per annum. Foreign currency lending interest rates for corporate clients ranged from a minimum of 5.00% to a maximum of 20.00%.

5. STOCK MARKET DEVELOPMENTS

ZIMBABWE STOCK EXCHANGE (ZSE)

During the quarter that ended December 2023, the Zimbabwe Stock Exchange (ZSE) recovered from losses recorded during the third quarter of 2023. Investor interest was largely concentrated in some selected wealth-preserving counters. As a result, all indices registered gains, with the All Share, Top 10, Medium Cap and Small Cap indices adding 66.48%, 59.27%, 84.83% and 85.53% to close at 210 833.92 points, 90 085.91 points, 920 516.25 points and 5 483 703.77 points, respectively.

The resource index also added 15.94% to close at 145 542.27 points during the quarter under review, compared to 125 531.67 points recorded in the third quarter of 2023.

On a year-on-year basis, the All Share, Top 10, Medium Cap and Small Cap indices gained 981.54%, 631.74%, 2 412.16% and 1 113.06%, respectively. The mining index also added 471.03%, from 25 487.77 points recorded in December 2022.
